The entire embedded design and manufacturing world now needs highly reliable systems as consumers start to widely use **electronics** to collect important information and enable real-time transactions. Applications in embedded designs are more complex. Fault tolerance and high availability are system requirements for most products. Overall, the most dependable equipment's specifications require 99.999 percent uptime, but some aerospace, medical, automotive, and telecommunications customers need even more reliable performance. High availability system design requires the ability to manage inevitable failures so that interruptions to foundational embedded functions or services are eliminated or reduced to a minimum. The embedded system can perform a task or provide a service to a user, but high availability systems are **stamped** mission-, **revenue**, or safety-critical to show the importance of the dependability. Critical systems need fault tolerance based on redundant hardware and standby components, while middleware software manages hardware and software performance to reconfigure high-availability systems if a failure occurs. Cluster systems reach high performance and high reliability by distributing critical computing tasks over multiple low-cost computers. Switch fabric interconnection configurations could replace the shared bus in high-reliability systems.

PRODUCT NAMES: EC Exchange (659631)

TITLE: Internet to Deliver EDI to the Masses

AUTHOR: Riggs, Brian

SOURCE: LAN Times, v14 n9 p9(1) Apr 28, 1997

ISSN: 1040-5917

HOME PAGE: <http://www.lantimes.com>

RECORD TYPE: Review

REVIEW TYPE: Product Analysis

GRADE: Product Analysis, No Rating

EC Company's EC Exchange, a virtual private network (VPN), transports **electronic** data interchange (EDI) transactions over the Internet to make EDI affordable and available to smaller businesses. EDI software developers plan to conduct interoperability tests so that EC Exchange can be **online** by Summer or Fall 1997. Economically-priced services and interoperable TCP/IP applications could create a change in EDI deployment, say experts, because EDI use will no longer be limited to the top echelon of large companies. Companies currently sending EDI transactions over value-added networks and smaller companies alike look forward to the availability of Internet-based EDI transmission. With EDI, companies send and receive purchase orders, sales orders, invoices, and **electronic** payments **electronically**. However, it has been expensive, complex, and proprietary, and therefore beyond the resources of most smaller companies. A market research company indicates that by the year 2000 over \$144 billion per year will be transmitted **electronically** from one business to another and from businesses to customers. EC Exchange manages **electronic payments** and time **stamps**, and archives document. It provides Internet links among trading partners using UUNET Technology's backbone. EC Exchange also translates document types to reduce the cost of converting the many implementation conventions that have developed over the years.

GRADE: Product Analysis, No Rating

Pitney Bowes has controlled the postage metering industry for over 60 years, but now faces competition from two Internet startups, E-Stamp and StampMaster. Both vendors are pioneers in the evolving online postage metering business, which could reduce Pitney Bowes' markets in the metering business. E-Stamp and StampMaster have been negotiating with the U.S. Postal Service for three years, and both recently began pilot projects that will test **online postal metering**. Both vendors will operate nationally starting in 1999, and E-Stamp has gotten financial backing from Microsoft, AT&T Ventures, and Compaq Computer. However, Pitney Bowes holds 15 patents sanctioned in Postal Service specifications, says an associate deputy general counsel at Pitney Bowes. Neither Internet startup, however, intends to pay Pitney Bowes any licensing fees. A spokesman for E-Stamp says that Pitney Bowes is behind the times, and that recent legal activity by Pitney Bowes is simply a reaction to market pressures. Online metering requires a vendor to set up accounts with customers, which are generally small businesses. Customers gain access to sites with a browser, download a quantity of postage, and are billed for the cost. Metering symbols can be printed, and are sanctioned by the U.S.P.S. E-Stamp also provides a stored value peripheral device that allows users to take the value of the postage offline, and its software can be integrated with Microsoft Word.

REVIEW TYPE: Product Comparison

GRADE: Product Comparison, No Rating

Pitney Bowes' ClickStamp Online and Stamps.com's Stamps.com are compared 'all-software snail-mail meters.' The PC-based postage systems are very convenient since they eliminate a processing step by printing postage on the fly while printing an address label or envelope. Addresses are also corrected during postage printing since ClickStamp and Stamps.com will both add omitted street designations (such as 'Ave' and 'St') and the last four digits of a ZIP+4 code. Users can purchase postage over the Internet and store it in a device, an identification unit called a vault that is stored in an encrypted space on a secure Internet server. A vault equates to a traditional mail meter. Stamps.com is a seasoned product that works without a hitch for one-off or group mailings. Stamps.com reads addresses from the Windows Address Book, adds new addresses, and corrects mistakes or omissions in the address. To do a one-off mailing, the user can load Stamps.com software or click a menu option in Microsoft Word 97 or 2000, WordPerfect, or personal information managers, including Outlook, ACT!, or Lotus Organizer. ClickStamp Online is available in a hardware-based vault that plugs into the PC; an all-PC version should be available early in 2000. Testers found ClickStamp Online bug-free and mostly easy-to-use, but it will not integrate with the Windows Address Book and word processing applications until 2000.

The right to make profits from selling postage online is being played out in court as a federal antitrust inquiry against Pitney Bowes undertakes to investigate alleged exclusionary, monopolistic conduct meant to interfere with the entry of new vendors to the market. Pitney Bowes, which sells and rents **postal meters**, competes with Stamps.com and E-Stamp, and the two latter companies report that they received requests for documents from the U.S. Department of Justice's antitrust division. A spokesperson for DOJ says the agency opened an investigation, which centers around possible anticompetitive conduct involving postage meter technology. Pitney Bowes has patents on postage inventions that date back to the 1980's, and filed lawsuits against E-Stamp and Stamps.com for patent infringement. In Summer 1999, the U.S. Postal Service approved plans for national availability of postage through Stamps.com and E-Stamp. John Payne, president and CEO of Stamps.com, contends that the fracas is simply another instance of an industry being upended when manufactured products are replaced with digital versions. ES denies any wrongdoing and says it will fight the lawsuit. E-Stamp, says the general counsel for the company, holds 20 of its own patents but would have preferred to settle out of court with Pitney Bowes.

**ABSTRACT:** Stamps , revenue stamps and lotteries are no more than paper, but they have value of money. They are similar, so they can be computerized with similar systems. In this paper, a system of New Year's Digital Lottery Postcards with privacy is designed similar to electronic revenue stamp . The seller and mailman can't know and the sender is hard to know who win the lottery. (author abst.)

**ABSTRACT:** In administrative fields, applicants have to pay fees for some applications. Currently, revenue stamp is used for such payment. In order to realize electronic application system, one issue is how to pay the commission through the communication network. This paper proposes a commission payment system that is a variant of electronic money systems. We use digital certificate of fee payment as the electronic revenue stamp , which is generated by smart card issued to applicants. Since the electronic stamp is generated at the applicants locally, the stamp can be transmitted with applications. The feature of the proposed system is that the payment procedure is handled in the same way as the current paper-based system. Therefore the payment verification processes at application receivers and the protocol between the applicants and the application receivers become simpler. (author abst.)

ABSTRACT: Now, commission payment of an application document to government  
and municipal offices is performed using the **revenue stamp**. When  
processing application procedure electronically, commissions also need  
to be paid electronically. This paper proposes a mechanism proving the  
commission payment using the electronic bill type value of a prepaid  
system using the smart card, and introduces the prototype. Moreover,  
when two or more application documents exist, how to apply the proposed  
**e-revenue stamp** system is examined. (author abst.)

ABSTRACT: This papaer describes the trends in information security  
technologies. First, it explains the core technologies, which include  
cryptography, cryptographic protocols, digital watermarking,  
biometrics, and tamper resistance. It then comments on key components,  
such as LSIs and smart cards, necessary for building secure systems.  
Finally, it describes the application systems Toshiba has been  
developing; namely, the electronic **revenue stamp**, the copy  
protection system for the IEEE1394 bus, electronic content distribution  
systems, the pay-mobile broadcasting system, digital broadcast  
satellite systems, electronic commerce systems, and plant control  
systems. (author abst.)

This report summarizes an examination of the financial statements of the  
Bureau of Engraving and Printing Fund for fiscal years 1974 and 1975. The  
Bureau of Engraving and Printing Fund was established to finance Bureau  
operations which consist principally of manufacturing U.S. paper currency,  
various public debt instruments, postage and internal **revenue stamps**,  
food coupons, and military payment certificates. Agencies using the  
Bureau's services make payments at prices adequate to recover costs of  
producing the items requisitioned. In fiscal year 1975 the Bureau added a  
surcharge to the prices customer agencies paid to finance capital  
equipment. Without specific statutory authority to increase its  
capitalization, the Bureau cannot levy and retain the surcharge.  
Recommendations are made.

**Abstract:** The next generation of postal processing equipment will

incorporate some method of verifying the postal **revenue** block ( **postal indicia** ) as a means of reducing postal fraud. The introduction of new **digital** printing technologies necessitates the encryption of revenue block information. This paper presents an approach for the verification process which includes algorithms for reading an encrypted postal indicia. In particular, postal indicia reading is tested for robustness against a variety of printing and media characteristics, and potential defects. (6 Refs)

DOCUMENT TYPE: Feature Article ISSN: 0278-0097 LANGUAGE: English

RECORD STATUS: New record

ABSTRACT: The use of integrated circuit smart cards and magnetic stripe cards is being increasingly promoted by U.S. federal and state agencies to **disburse** food **stamps** and other public assistance and to assist in health care administration. Planning costs, implementation costs, and operational costs are the direct costs of smart cards. The use of such cards can greatly reduce various diversions of funds and counterfeiting, can improve self-esteem of assistance recipients, may help to mainstream many recipients who are less accustomed to **electronic** funds and bank accounts, may create manufacturing and banking jobs, may force federal and state governments to absorb some losses that were previously met by recipients, and can stimulate the economy. A national medical-record card or a centralized medical-records database would greatly change individuals' sense and expectation of privacy.

Quick renewal

MALAYSIA: FAST **ELECTRONIC** APPROVAL FOR PASSPORTS  
The Star (XAT) 06 Mar 1997 P. 1  
Language: ENGLISH

The Immigration Department of Malaysia will set up Infokiosk terminals at strategic areas in Malaysia to enable the public to get their passports and visa renewals approved **electronically**. The Infokiosk's computer system will be connected directly to the main computer of the Immigration Department's headquarters. However, the Infokiosk cannot approve first time passport applicant's passport application and lost passports. These will need the applicant to go personally to the respective state immigration departments. A personal appearance at the department need also be made for renewal **stamping** and **payment** of charges but these can be done through an appointment at the applicants convenience. Besides giving instant approval on passport and visa renewals, the Infokiosk terminals will also provide information on the latest services offered by the Immigration Department. The Infokiosk is to be launched in the later part of 1997.

Abstract: Traditionally, postage stamps have been purchased at post office counters, **authorized** stamp vendors, or coin-operated vending machines. Business mailers use a postage to print a **postal indicia** as proof of **payment** instead of using **stamps**. The smart card, with its embedded computer, is the key to providing the security needed for a public access postal system. The DES algorithm is encoded on the smart card and in the Smart Postage Dispenser terminal to provide secure access and secure funds management. This paper describes the experimental Smart Postage Dispenser system and the smart cards used in the trial, along with the funds security and funds management arrangements. The system is on trial at Loughborough University, within a general smart card trial organized as a joint effort between GEC Card Technology and Midland Bank. (0 Refs)

**THE IMPACT OF THE TARGETED JOBS CREDIT ON THE EMPLOYMENT DECISION PROCESS**

Author: O'NEIL, CHERIE JEANNE

Degree: D.B.A.

Year: 1980

Corporate Source/Institution: UNIVERSITY OF COLORADO AT BOULDER (0051)

Source: VOLUME 41/04-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 1662. 229 PAGES

Descriptors: BUSINESS ADMINISTRATION, ACCOUNTING

Descriptor Codes: 0272

Tax credits, such as the targeted jobs credit, are a cost to the government since they result in lost revenue. These credits, along with other tax subsidies, escape the close scrutiny paid to direct appropriations since they are not shown in the federal budget and no agency studies or controls them. The exact cost of these subsidies is unknown and even less is known about their benefits, yet tax credit proposals continue to be a popular legislative topic.

The targeted jobs credit was enacted by Congress in 1979 in order to reduce the unemployment rate among certain traditionally high unemployment

groups in the hope that such action would enable the federal government to reduce its outlays for welfare **payments** and food **stamps**. The purpose of this research was to **determine** if the targeted jobs credit acted as an incentive to employers to increase their hiring of certain targeted groups. The research design centered upon the construction of an employment decision model in which the targeted jobs credit was introduced as an additional variable in the employment decision process.

The techniques used in human **judgment** research, particularly those research methods used in consumer research, were applied to the employment decision model. The employer was thought of as a "consumer" who was **evaluating** the attributes of a "product"--in this case, hypothetical job applicants. The employer was asked to make numerous employment decisions using a six point rating scale which ranged from definitely do not hire (-3) to definitely would hire (+3). The employment decisions were based upon thirteen employment attributes, five of which pertained to the targeted jobs credit categories (economically disadvantaged Vietnam veterans, economically disadvantaged youth, applicants who received vocational rehabilitation training, recipients of public assistance and economically disadvantaged convicted felons), seven of which pertained to general employment attributes (work-related experience, appearance, number of jobs in last three years, promotability, level of education, length of residence, and number of dependents), and one of which pertained to the presence of a tax credit.

Thirty hypothetical employment profiles were presented in a questionnaire which was sent to 699 employers in the metropolitan areas of the state of Colorado. The information contained in the 197 returned questionnaires was analyzed by means of descriptive statistics, the Wilcoxon Matched Pairs Ranked Signs Test, Monotone Analysis of Variance, and analysis of variance. It was hypothesized that the targeted jobs credit would not have any significant impact on the employment decision process and that, when the targeted jobs credit was utilized by the employer, it was a windfall tax benefit which rewarded the employer for hiring an applicant who would have been hired anyway.

The results of the Wilcoxon Matched Pairs Ranked Signs Test **confirmed** the presence of a windfall tax benefit, since 44 percent of the decisions resulted in windfall gains. In another 39 percent of the decisions the targeted jobs credit had no impact on the decision process, in 10 percent of the decisions it had an adverse impact on the decision and in only 7 percent of the decisions did it result in an employment decision in which an employer hired an otherwise unacceptable applicant.

Analysis of variance **determined** that the thirteen variables contained in the hypothetical applicant profiles were a statistically significant part of the employer's decision making process, but they explained **less than** 40 percent of the decision making process of the participants in the study. Of that 40 percent, the targeted jobs credit explained only about 2 percent.

Although application of Monotone Analysis of Variance to the employment decision variables was unsuccessful, it still should be considered as a statistical tool in future tax credit research. It is appropriately used when the decisions to be made are rank ordered rather than rated on a scale.

Since the conclusion of this study is that the targeted jobs credit has very little impact on the employment decision process, the recommendation is that the credit be allowed to expire as planned in 1981 and that other tax credits recently enacted, such as the energy tax credit, should be examined to **determine** what their impact is, if any, on the decision making process of individuals and to **determine** the extent of the presence of windfall tax benefits.

751502 ORDER NO: AAD81-17278

**HUNTING SITE SELECTION: A PRELIMINARY INVESTIGATION WITH APPLICATION TO MICHIGAN'S PUBLIC ACCESS STAMP PROGRAM**

Author: WESTFALL, RICHARD DENNIS

Degree: PH.D.

Year: 1981

Corporate Source/Institution: MICHIGAN STATE UNIVERSITY (0128)

Source: VOLUME 42/02-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 854. 178 PAGES

Descriptors: RECREATION

Descriptor Codes: 0814

Hunters and wildlife managers are concerned with the reduction in hunting opportunities on privately-owned, rural land in southern lower Michigan. In response to this concern, the Public Access Stamp (PAS) Program was established by Public Act 373 of 1976. The PAS Program **authorizes** the Michigan Department of Natural Resources (DNR) to require all who hunt in southern lower Michigan (DNR zone 3) to purchase a "Public Access Stamp ." The **revenues** generated from the sale of such stamps is used to "lease" land from private landowners in zone 3 for public hunting.

The purposes of the study reported herein were to (1) **determine** the need for the PAS Program--were urban hunters without rural land contacts (PAS Program clients) dissatisfied with the number of hunting opportunities available to them, (2) profile zone 3 hunters on the basis of their characteristics and behavior and **determine** if PAS Program clients differ from other zone 3 hunters, (3) investigate the hunting site selection (HSS) process of zone 3 hunters and **determine** if they could be segmented on the basis of how they select hunting sites, and (4) to **evaluate** the PAS Program in 1977-78 from the hunters' perspective.

Research literature on hunting, private lands and **less than** fee simple land acquisition techniques, hunter access program **evaluations**, and hunters was reviewed. This literature pointed to the need to generate information specific to zone 3 hunters and the PAS Program in order to meet the objectives of the study.

A HSS model was developed based on a consumer behavior approach to study the hunter's decision strategy in selecting a hunting site. The model consisted of five HSS decision strategies: "habit", "systematic", "recommended", "satisfice", and "important feature." Three decision strategies (systematic, recommended and a combination of satisfice and important feature) were hypothesized to be predictable using eight characteristic and behavior variables.

Three research hypotheses were postulated relating to the first three study objectives. To meet the study objectives and test the research hypotheses, a survey of zone 3 hunters was conducted in the Spring of 1978. Research methods consisted of (1) identifying the population to be surveyed and selecting a sample, (2) developing a survey instrument and pretesting it, (3) administering the survey instrument to the sample, and (4) data coding, transfer to computer and analysis. The study population was all zone 3 hunters, estimated to number 515,000 in 1977, and the sample consisted of 1,078 hunters residing in or near zone 3 who had been previously surveyed by the DNR in one of its game surveys. The survey instrument was a self-administered, mailed questionnaire and three mailings were utilized to elicit a response by 641 hunters. The data were analyzed using computer programs available in the Statistical Package for the Social Sciences.

The results of the survey indicated that respondents (1) lived in a rural setting, (2) had considerable hunting experience, (3) hunted small game most often, (4) hunted all day on opening day and week-ends after opening day, but hunted afternoons on week days after opening day, (5) hunted within a 15 mile drive of their home, (6) hunted with one other hunter, (7) hunted for a variety of reasons (getting out-of-doors the most important and killing game the least important), (8) obtained information on places to hunt from others, (9) utilized a variety of types of information to select hunting sites, and (10) selected hunting sites on the basis of one important feature.

In terms of the PAS Program, respondents (1) first learned of the

Program when they bought their hunting license, (2) did not attempt to find out about the Program, and (3) suggested the Program be discontinued.

Tax revenue rises 24% to \$18.7b  
SINGAPORE: 24% SURGE IN TAX REVENUE FOR 2000  
Business Times (XBA) 21 Feb 2001 p 8  
Language: ENGLISH

The Inland Revenue Authority of Singapore (Iras) has reported that for 2000, tax collection from companies and individuals saw a surge of 30% while tax revenue for the year was 24% higher at S\$ 18.7 bn from S\$ 15.0 bn in 1999. Total tax collections from firms and individuals stood at S\$ 12.2 bn in 2000, thanks to higher income earned. The outlook for 2001 for tax collection is expected to be higher as higher income is expected. The third largest contributor to tax revenue for Iras in 2000 was from property tax which was up by 27% to stand at S\$ 1.4 bn while estate duty **increased** 81% to stand at S\$ 83.6 mn. The second largest collection of tax was from the goods and services tax (GST) which jumped 22% to S\$ 2.2 bn in 2000 as compared to S\$ 1.8 bn a year ago. **Stamp** duty and tax **revenue** from sweepstakes, betting and private lotteries stood at S\$ 1.4 bn and S\$ 1.4 bn respectively.

Exchequer surplus running at t674m as tax receipts pour in  
IRELAND: TAX INCOME BOOSTS REVENUE SURPLUS  
Irish Times (IT) 04 May 2000 p.18  
Language: ENGLISH

Buoyant tax revenues, despite the implementation of tax cuts during April 2000, have contributed to an IRt 674mn Exchequer surplus for the month. Although the figure was down from the record of IRt 1,009mn for the end of March, it was stronger than the year earlier figure of IRt 111mn. The government believes that the surplus may be around IRt 2.1bn by the end of 2000, rather than the previously predicted IRt 1.6bn. During the first four months of the year around IRt 2.17bn was taken in income tax, and experts believe that there is no sign of a slowing-down of the economy. The housing market saw **stamp** duty **revenue** growth **increase** to 33.4% from 27.7% in March, while VAT receipts also rose from 20.9% to 21.9%.

State budget proposes RS 295 cr fresh taxes

INDIA: MAHARASHTRA STATE BUDGET HIGHLIGHTS

Times of India (TSI) 19 Mar 1997 p. 1

Language: ENGLISH

The Indian state of Maharashtra has unveiled its budget for the next 12 months. Main highlights of the budget read out by state finance minister Eknath Khadse are:- 1. Professional tax has been **increased** from RS 850 to RS 1,000 per year. 2. One-time tax is to be levied on ad valorem basis on purchase of cars and jeeps for personal use. 3. Tax levels have been **reduced** from 13% to 2% on heat resistant rubber tape, rubber thread, twines, ropes and articles made of artificial silk fibre; from 8% to 4% for sports goods, bicycles, toys, tricycles and their spare parts, earthen rooftiles and agarbatti. Taxes on brushes used by artists, canvas board, geometry sets, poster and oil sketching papers, mechanical watches, plastic fibres, hand pumps, and spare parts used for agricultural electric pumps has been **reduced** from 13% to 4%. Taxes on X-ray equipment, pickles, telescopes, dictaphones, bakery products, teaching records and cassettes, cinematographic equipment, weighing machines, photographic cameras and duplication machines has been **reduced** from 13% to 8% while coconut oil tax has been **reduced** to 1.5% from 4%. 4. Exemption limit for luxury tax on hotel accommodation **reduced** from RS 500 to RS 200 per person. 5. Penalty on non- **payment** of **stamp** duty pegged at 2% per month and an amnesty scheme for cars registered outside of Maharashtra has been introduced. 6. Sales tax on goods carriages, omnibuses, non air-conditioned tourist vehicles and air- conditioned vehicles has been **increased**.

BEA cuts mortgage rate to 9pc  
HONG KONG: BEA TO LAUNCH NEW MORTGAGE LOAN  
The HongKong Standard (XKR) 16 Apr 1996 FR p.3  
Language: ENGLISH

In Hong Kong, the Bank of East Asia (BEA) plans to launch a new mortgage loan package for homebuyers. The details of the package are as follow: (1) Interest rate is set at 9.25%, 1.75% points over the 8.5% prime rate. The new rate is one percentage point cut from the present standard 10.25% mortgage rate. (2) Professionals will receive another 0.25% point of **reduction**. (3) A number of repayment methods are offered: a. progressive repayment method: borrowers can **increase** the percentage of its monthly instalment (specified by them), on a yearly basis. b. fortnightly repayment method: repayment of the loan principal changed to once every 15 days from once-a-month payment. (4) Bridging loan is offered for home-owning customers to cover various costs such as down **payment** cost, **stamp** duty, legal costs etc. The bridging loan is set at 0.75% point over the prime rate, or up to 70% of the existing properties' value. (5) Repayment term: 30 years which is extended from 25 years. It is still profitable for mortgage loan rate to set at 8.75%, said David Li, BEA deputy chairman and chief executive. \*

Two new measures may help property market  
SINGAPORE: **REDUCTION** IN PROPERTY TAX  
The Straits Times (XBB) 29 Feb 1996 Budget SpecialP.IV  
Language: ENGLISH

The Government does it again. Having **reduced** the rate for industrial, commercial and let-out residential properties from 16% to 15% in 1994 and from 15% to 13% in 1995, it has again **reduced** the property tax to 12% in 1996. This is one of the two new measures introduced by Singapore's Finance Minister Dr Richard Hu in his budget report for fiscal year 1996 to boost the property market. The other is an adjustment in the threshold values for stamp duty on property transfers to 1% for the first S\$ 180,000 (instead of the first S\$ 90,000), 2% for the next S\$ 180,000 (instead of the next S\$ 60,000) and 3% thereafter. The property tax cut, effective from 1 July 1996, will result in revenue loss of S\$ 118 mn annually. The change in the structure of stamp duty on property transfer, effective immediately, will cost the Government S\$ 245 mn annually. Dr Hu also **reduced** by 50% stamp duty rates on property leases. Effective immediately, it will **reduce stamp duty revenue** by S\$ 161 mn annually.

State deficit to fall by \$100m  
AUSTRALIA: NSW DEFICIT TO FALL BY AUD 100 MN  
The Australian (XAA) 8 Apr 1994 P.4  
Language: ENGLISH

In New South Wales (NSW), Australia, the Government has announced that the Budget deficit for 1993-1994 would fall by about AUD 100 mn. Originally, it has been forecast that the Budget deficit for 1993-1994 would be AUD 890 mn and falling to below AUD 600 mn by 1995-1996. The Treasurer, Mr Collins, said that **increased** government **revenue** from **stamp** duties and lower interest rates as well as positive effect from the Olympic Games bid would bring the deficit to below AUD 800 mn.

Total takings of Inland Revenue Authority rise 15pc to \$10.3b  
SINGAPORE: 15% RISE IN INCOME TAX REVENUE  
Business Times (XBA) 17 Feb 1994 p.1  
Language: ENGLISH

The Inland Revenue Authority of Singapore (IRAS) recorded an **increase** of 15% in total takings to SD 10.3 bn in 1993 compared to 1992. It was

reported that the largest contributor to the IRAS **revenue** in 1993 was **stamp** duty increasing 57% to SD 972 mn as a result of the bull run in the stock and property markets. The second largest contributor to the IRAS revenue was derived from property tax rising 14% to SD 1.64 bn in 1993. In addition, revenue from betting and sweepstakes also **increased** by 15% to SD 696 mn in 1993.

Post Office aims to lick a first class fraud  
UK: WIDESPREAD USE OF FORGED STAMPS  
Sunday Telegraph (STH) 31 Oct 1993 p.3  
Language: ENGLISH

The widespread sale of forged first class **stamps** could be **reducing revenues** to the Post Office by between GBP 1mn and GBP 10mn. There could be around 40,000 to 400,000 of such stamps in circulation. The sale of forged stamps has been made easier by a law in 1988 allowing shops to sell stamps. Currently about 50,000 shops sell them, as well as 20,000 post offices. The forged stamps are sold to shops door-to-door, and they are good enough to fool Post Office Sorting Equipment. The Post Office is working with the Police in trying to stamp out the forgeries.

Taxman's 'hammer to crack a Pep nut'

UK - PEP CHARGES MAY **INCREASE**

Daily Telegraph (DT) 18 March 1992 p27

Charges and admin on personal equity plans (Pep) savings schemes may well have to rise if new Inland **Revenue** conditions, aimed at **stamping** out tax cheats, are adopted. The proposed rules involve investors completing application forms for each year they make subscriptions into their Pep schemes, vs each time they make a lump sum investment or change their manager as happens at the moment. Unit trust managers have warned that charges could rise if the proposed rules are adopted, while some say they would consider withdrawing such savings plans. The Unit Trust association, which represents approx 127 firms, intends contacting the Inland Revenue to complain that it was not consulted on the matter.

**Household composition, acculturation, and diet among low-income Puerto Rican households**

Author: DeLeon, Jessica Maria

Degree: Ph.D.

Year: 2000

Corporate Source/Institution: University of Florida (0070)

Chair: Helen I. Safa

Source: VOLUME 61/12-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 4834. 199 PAGES

Descriptors: ANTHROPOLOGY, CULTURAL ; SOCIOLOGY, ETHNIC AND RACIAL STUDIES ; WOMEN'S STUDIES ; HEALTH SCIENCES, NUTRITION ; SOCIOLOGY, INDIVIDUAL AND FAMILY STUDIES

Descriptor Codes: 0326; 0631; 0453; 0570; 0628

ISBN: 0-493-05994-6

Research on the relationship between household composition, acculturation on diet among twenty-two, low-income, Puerto Rican nuclear, female-headed and extended family households was conducted in Hartford, Connecticut. Methods included semi-structured and ethnographic interviews, an ethnicity/acculturation measure and extended participant observation.

Children across households consumed a similar number of meals, but snack consumption was higher among extended households. Children in female-headed households consumed less fruit than children in nuclear or extended family households. Vegetable and meat consumption was highest among children in nuclear family households, while dairy consumption was highest for children within female-headed families.

The diets of nuclear families benefited from the presence of a male wage earner, but any change in his economic contribution food security severely and suddenly impacts food insecurity. Heads of female households employed household survival strategies to combat food insecurity, including long-term meal planning, food rationing, skipping meals and selective purchasing. Transfer **payments** and food **stamps** are insufficient to support most families, leading to repeating cycles of food insecurity. Members of extended families, particularly children, benefited from the diets of older members that include more fresh, staple foods, less processed foods, and less restaurant food. For all households, Puerto Rican food consumption continued but declined, and American foods were added. Increased meat and vegetable consumption were positively correlated with high ethnicity/low acculturation measures.

Breakfast has become larger and more varied, and meat, processed foods and restaurant food consumption has increased for breakfast and lunch. The consumption of traditional foods for breakfast and lunch have declined, while American foods have increased. Dinner patterns changed the least, but changes included the addition of processed meats, green and orange vegetables, and American mixed dishes.

Dietary recommendations include the **replacement** of processed foods with fresh and homemade choices, increased fruit and vegetable intake, reduced consumption of salty and high fat foods, and a reduction in the consumption of sugary drinks. Educational programs on frugal shopping and healthy and cost-conscious cooking techniques are needed to improve dietary patterns. Social programs that facilitate the creation of social support networks among low-income women would benefit them and their families psychologically, economically, and nutritionally.

Over half the 3.2 Million people in Puerto Rico receive food stamps. Food stamps may replace dollar as unit of exchange in supermarkets. Pervasive use of stamps has changed nutrition, economy and work habits of commonwealth. Industry leaders say situation has induced 'welfare state mentality' and seriously undermined work ethic. New rules have lowered maximum annual income for eligibility to \$5,500, making fewer people eligible. Requirement of partial cash payment for stamps has been dropped, making it easier for those who are eligible to participate in program. It has become nearly impossible to police program to insure that stamps are not used for purposes other than purchasing groceries. Gov Carlos Romero Barcelo and Dr Parimal Choudhury comment (M.)

Nixon Adm plans to propose in March sweeping program of cash assistance to poor that would replace present housing and welfare systems. Proposal seen generating controversy in Cong because many members object to providing cash payments to poor. Sen Dem leader Mansfield tells reporters that change in welfare system would be difficult if it includes cash payments. Plan would provide cash benefits to poor and near-poor, replacing such programs as welfare payments and food stamps. Plan would include some kind of cash allowance for housing whereby recipients would find their own dwellings with Fed subsidy. Figure under consideration is \$3,200 for family of 4. Single persons would be included in plan. Dr John L Palmer, dir of income security policy of HEW Dept, describes plan (L.)

E2.26 bln in tax revenue to the budget

Serbia: Tax revenue increased  
Serbia Info (ESK) 15 Aug 2002  
Language: ENGLISH

The Serbian state collected around EUR 2.8bn (US\$ 2.76bn) of budget income in the first seven months of 2002, an increase of 77% compared to 2001. Most revenue came from tax collection of around EUR 2.26bn, an increase of 106%, while the turnover tax came up to EUR 1.37bn with the excise **stamp revenue** total of EUR 398mn. Profit taxes **amounted** to EUR 655bn, property tax was EUR 85mn while rest of the taxes **amounted** to EUR 152mn. The customs revenue increased by 85% (EUR 206mn) compared to the first seven months of 2001. \*

China to maintain active fiscal policy next year

CHINA: FISCAL REVENUE HIT RMB 956.1 BN  
China Daily (XKP) 17 Oct 2000 Online  
Language: ENGLISH

Figures from the Ministry of Finance show that China posted a total of RMB 956.1 bn (US\$ 115.19 bn) worth of fiscal revenue for the period between January and September 2000. This is some 21% growth from RMB 790.17 bn marked during the same period in 1999. Of the total, added value tax revenue saw a rise of 22.4% growth in the nine-month period, while tariff **revenue** expanded 32%. Securities **stamp duty revenue** surged 81.6%, while corporate income tax revenue hiked 31%. Personal income tax revenue took a 60.3% leap. Meanwhile, fiscal expenditures for the nation **amounted** to RMB 945.3 bn (US\$ 113.89 bn), a jump of 22% from RMB 774.84 bn.

Tax collection shoots up over six years to record \$22 billion

SINGAPORE: GOVERNMENT'S TAX REVENUE ON THE RISE  
The Straits Times (XBB) 10 May 1997 P.48  
Language: ENGLISH

The Government of Singapore collected a record S\$ 21.92 bn in tax revenue in 1996, up from S\$ 10.53 bn in 1990, S\$ 15.45 bn in 1993 and S\$ 19.58 bn in 1995. Corporate and personal income taxes account for nearly 50% of the government's total tax revenues. Income tax collections stood at S\$ 9.54 bn in 1996, more than doubled from S\$ 4.91 bn in 1990. Motor vehicles taxes, the government's second largest source of tax revenue, **amounted** to S\$

2.44 bn in 1996, compared to S\$ 1.34 bn in 1990. Stamp duty, which amounted to S\$ 1.83 bn in 1996, was the government's third largest source of tax revenue. Stamp duty collected in 1990 amounted to only S\$ 655 mn. Total GST collection stood at S\$ 1.79 bn in 1996 but it was offset by S\$ 1.8 bn in GST rebates. The government's tax revenue also comes from asset taxes, betting taxes, and customs and excise duties.

Pres Reagan, in his first State of the Union Message, vows to retain his basic program of tax relief and seek no tax increases in '82. Announces sweeping program to give states and localities control, starting in '84, over Federal programs estimated at \$47 billion. Calls for 'financially equal swap' to rearrange relationship between Federal Government and states with 'single, bold stroke'. Outlines plan in which Federal Government would give up its responsibility for food stamps and payments to poor families with dependent children, the cornerstone programs of Federal welfare system. Federal Government, in return, would relieve states of all financial responsibility for Medicaid, starting in fiscal '84. Swap would be part of broader transfer over 10-year transition period that would assign to states many highway, urban renewal, education and social services. Says states will be in complete control of over 40 Federal grant programs by '88. Calls on Congress to set up 'grass-roots trust fund' to give states \$28 billion a year in revenues from Federal excise taxes to pay for their new responsibilities. Reagan photo (M).)

...ABSTRACT A2

This invention relates to an **automatic** machine capable of reading data on a postal current **account payment** slip and transmitting them to a data processing center connected to the machine, which also cuts, **stamps** and returns the receipt if **payment** has been made, or returns the **payment** slip, complete, if the data processing center has not approved the payment. ...

...SPECIFICATION B1

The present invention relates to an **automatic** machine for **reading**, **cutting** and printing **stamps** on postal current **account slips**.

Currently, prepared postal current **account payment** slips, **complete** with the amount due, the code of the consumer and the postal current **account** number to be credited are sent to the consumer for the payment of various services...

...this case, the amount to be paid is debited to the consumer's postal current **account** with the bank.

To date, only **automatic** machines capable of printing **stamps** and cutting the **payment slip** are available. This is done after receipt of the cash **payment** by the office employee or after the office employee has controlled that the current **account** holder has sufficient funds to cover the amount to be debited to the current account.

It should be pointed out that in this **technical** field there are also some **automatic** machines able to fill in **checks** and documents: in

this regard patent GB-A-2 131 353 is particularly interesting . It describes a device which is able to print information on documents and checks.

This...

...in a document, but also can perform most complicated and numerous operations.

In fact the aim of this invention is to further simplify postal current account payments with an automatic machine designed not only to print stamps and cut these payment slips but also to read all data and to transfer them to a data processing center which compares the data which those...

...CLAIMS first motors (6a and 6b) so as to eject the slip from the machine.

2. Automatic machine for reading, cutting and printing stamps on postal current account payment slips, according to claim 1, characterized in that the second motor (12) stops each time the geared wheel (13) has completed...

English Abstract

...particularly suitable for an account card having a limited, non-erasable memory used in an **automated** transaction terminal for maintaining an **account** record of transactions in frequently recurring amounts. A **postage metering** terminal (20) is operated by the **account** card, in which an initial **balance** has been written and each purchase of postage is recorded. A current balance is recomputed...
